

Hello class of 2021 families,

Greetings from the CAPS team at Excel! We are so proud of your students' hard work and persistence as they approach their high school graduation and we are excited to introduce you and your students to the Postsecondary Support program.

Excel Academy's Postsecondary Support program is committed to serving students and families for up to six years post-high school graduation. Regardless of a student's postsecondary pathway and goals, we are here to be supportive in any way. We check in regularly with students by text, email, and phone. We also visit our local students twice per year and connect virtually with students further away. For students in college, we provide coaching with accessing academic resources, selecting courses, completing financial aid forms, understanding their bill, and pursuing internships. For students who choose a career pathway, we provide coaching to ensure students reach their career goals. We invite you to view this video to learn more about the Postsecondary Support program:

<https://www.loom.com/share/de6ce31109ae4461a5ad590e63c2ecf3>.

Based on a student's chosen postsecondary plan, they will be assigned to one of our three postsecondary counselors. Postsecondary counselors have already begun meeting individually with students and will continue to do so throughout the summer as they transition to their college or career pathway.

We invite you to contact the postsecondary counselors if you have any questions or wish to speak further about our program.

Sincerely,

Mrs. Lauren Flinn (she/her)
